

Everyday Materials	Everyday materials are the materials we see everyday such as, wood, plastic, glass, metal, water and rock.
Properties	Properties are what the material looks like/feels like, such as, bendy/hard, cold, shiny, dull etc.
Investigation	A quest to find the answer to a question using the scientific method.
Fair Test	When investigating, we must keep everything the same in order for the test to be conducted correctly.
Waterproof	A material that does not let water through.
Windproof	A material that gives protection from the wind.
Transparent	A material which you can see through.

National Curriculum Objectives:

All pupils should be able to:

Distinguish between an object and the material from which it is made.

Identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock.

Describe the simple physical properties of a variety of everyday materials.

Compare and group together a variety of everyday materials on
